Case Study

Intelligent Process Automation

Kansas Paving Paves the Way for Invoice Automation with docAlpha

ImageLink document management system customer Kansas Paving successfully implemented docAlpha from Artsyl Technologies to put their AP invoice process on the fast track. The company has significantly reduced the effort required to process paper invoices by integrating the docAlpha Smart Process Platform with ImageLink and Microsoft Dynamics SL to create an automated, end-to-end process. As a result, Kansas Paving's AP team simply scans their paper invoices and allows docAlpha to intelligently capture relevant information like vendor name/address, invoice number, amount, etc. Scanned invoices are automatically filed to the ImageLink document management system, which forwards invoice data and documents to Dynamics SL for processing.

For more details, visit the ImageLink Web site.

Artsyl

For over a decade, Artsyl has delivered smart process automation solutions that begin with the most painful and inefcient step in any process — manual data entry. By leveraging data and documents to intelligently handle data capture, extraction, classifcation and routing, Artsyl streamlines end-to-end operations for improved efciency, visibility, compliance and control.

Artsyl's docAlpha platform reduces manual document handling, eliminates data entry, increases data accuracy, accelerates workflows and ensures standards compliance. Supported by robust reporting that increases process transparency, Artsyl solutions empower organizations to monitor KPIs, eliminate approval bottlenecks and reduce cycle times while providing instant auditability.
